

EXECUTIVE SUMMARY: THE DMAIC JOURNEY

The Phase	Objective	
DEFINE	Strategic Scoping	Defined project boundaries and established a baseline Sigma level of 3.27 to track \$98.22M in leakage.
MEASURE	Data Validation	Quantified process yield at 22.6% and identified high-frequency defect concentrations across 3 key locations.
ANALYZE	Root Cause Discovery	Applied the 80/20 rule to pinpoint that "Casual Wear" and "T-shirts" drove 60%+ of total revenue leakage.
IMPROVE	Profit Optimization	Developed a "What-If" simulation to optimize profit buffers, projecting a recovery of \$137.31M in revenue.
CONTROL	Governance & Audit	Implemented a real-time Audit Trail and receipt tracking system to ensure sustained process health and compliance.
